

Spring Sports Update

The spring sports season in the State of Michigan is underway and the Detroit Community Hurricanes have begun competing. Girls Softball, Boys Baseball and Boys/Girls Track and Field are the spring sports that Community currently offers. There are over 60 students who participate in these sports. The students will compete in approximately 48 games and meets, not including the league championships and State Tournament.

Jaime Herrod (Track), Julie Risher (Softball), and Terrell England (Baseball) are the coaches who will be leading our student athletes. This is only the second season for softball and baseball was reestablished last season after a 4season layoff.

In addition to the competing spring sports, the football and basketball teams are conditioning. Also, our basketball teams (girls and boys) are entering a number of summer camps that will be played all over the State of Michigan during the months of June and July

The spring and summer are busy times for our student athletes and participation by these youngsters are vital times in the education of the student athlete. Visiting different parts of the city and state will enhance in their overall development.

DECEMBER 12, 2012
